<h3>For 2,670kg Nominal Wheel Load</h3>		

NOTES:

1. Specific site conditions may require an increase in these dimensions or reinforcement. It is the customer's responsibility to ensure the concrete encasement is designed for the application. *Engineering advice may be required.*
2. A minimum concrete strength of 25MPa is recommended. The concrete should be vibrated to eliminate air pockets.
3. The finished level of the tiles must be flush with the top of the frame.
4. 45mm minimum thickness of concrete must be set into the base of the cover prior to pouring concrete surround.
5. The tile course adjacent to the frame edge must be fully bonded to the concrete surround.
6. Refer to ACO's latest installation instructions for complete details.
