Product Features

- Designed for dry cutting of polymer concrete products and composite stone.
- Available with a universal 1/2" BSB thread to suit heavy duty arbours, in both Hexagonal shaft and SDS Plus shaft configurations.
- Clean, uniform penetrations with minimal "Blow Out", resulting in;
 - fast and easy clean up,
 - a tighter fit for conduit and piping,
 - superior waterproofing conditions, maximizing sealant strength and life.
- Use of these holesaws eliminates the stresses other drilling and punching techniques have on the polymer concrete casting.
- For holesaws listed, use of 800W to 1500W power drill is recommended.
- Other sizes are available. Contact ACO for more information.

Available sizes:

To suit pipe nom(mm)	Part No.	Description
90	99095	Sintered 95mm System - Hex shaft
100	99120	Sintered 127mm System - Hex shaft
125	99150	Sintered 152mm System - Hex shaft
150	99170	Sintered 180mm System - Hex shaft
-	99200	SDS Plus Arbour*

*conversion component for SDS Plus drills.
